# 1 Overview

**Producer name:** LLC BelaBio-Grupp  
**Producer location:** 223644, 13 Lesnaya str., Gatsuk agro-town, Slutsky district, Minsk region, Republic of Belarus (legal address, production )  
**Geographic position:** N 53°20'2.27" , E 27°31'25.72"B  
**Primary contact:** Marina Golovkova, address: 220018, 19 Sharangovicha str., office 216 a, Minsk, Republic of Belarus, telephone: +375447072067, e-mail: [belabio2018@gmail.com](mailto:belabio2018@gmail.com) (mailing address)  
**Company website:** [www.belabio.com](http://www.belabio.com)  
**Date report finalised:** 24/02/2020  
**Close of last CB audit:** 28/02/2020, Minsk  
**Name of CB:** NEPCon  
**Translations from English:** Yes  
**SBP Standard(s) used:** Standard 2 version 1.0, Standard 4 version 1.0, Standard 5 version 1.0,  
**Weblink to Standard(s) used:** <https://sbp-cert.org/documents/>  
**SBP Endorsed Regional Risk Assessment:** Not applicable  
**Weblink to SBE on Company website:** Not applicable

## 2 Description of the Supply Base

### 2.1 General description

*LLC BelaBio-Grupp is a biomass producer located in agro-town of Gatsuk, Minsk region of the Republic of Belarus. For the production of SBP-compliant biomasses, LLC BelaBio-Grupp purchases only SBP-compliant primary feedstock (lowgrade roundwood and wood chips with FSC 100% claim) from 5 local suppliers – state forest enterprises (leshozes). Roundwood is chipped at the plant and is used for pellets production.*

*LLC BelaBio-Grupp defined the forest fund area of the Republic of Belarus as a supply base, as the structure of suppliers can change, but only within the Republic.*

*In the Republic of Belarus, forests are one of the main renewable natural resources and the most important national wealth. The total land area of the forest fund is 9.582 million hectares. Forestcovered lands occupy 9.582 million hectares. The total standing stock of wood stands at 1,796 million cubic meters, including 296 million cubic meters of ripe and mature plantings. As a result of focused work on the reproduction of forests, the area covered by forests is increasing. So, over the past 60 years, the forest cover of the republic has almost doubled and reached its maximum values for more than a century. The increase is occurring both naturally and due to afforestation of badlands unsuitable for agriculture. In Belarus, along with an increase in the total area of the forest fund, a steady growth in the areas of maturing, mature and overmature stands is observed. The share component of ripe and mature forests is 14.7%. The average age of stands is 56 years.*

*In the forests of Belarus there are 28 species of trees and about 70 species of shrubs. The most common tree species are: Skots pine - 50.3%, Silver birch - 23.2%, Norway spruce - 9.2%, Black alder - 8.5%, oak - 3.4%, aspen - 2.1% .*

*Depending on the functions performed, the lands of the forest fund are divided into forests of the first and second groups. The first group includes specially protected natural territories, the share of which is 52%, the second group includes production forests intended for timber harvesting (48%).*

*In accordance with the legislation of the Republic of Belarus, all the lands of the forest fund are in state ownership and transferred to the use and management of state forestry institutions. Forest management in Belarus is carried out according to the principle continuity and inexhaustibility. The average annual wood harvest is about 18 million cubic meters per year, of which:*

- main cutting (in ripe stands) 40%;*
- thinning and sanitary felling (in young, middle-aged and ripening stands 48%);*
- other felling 12%.*

*Ensuring high-quality reproduction of forest resources and protective afforestation is a prerequisite for the use of forests. So in 2018 reforestation and afforestation carried out on a total area of 41.82 thousand hectares, including 34.8 thousand ha of new forests laid due to sowing and planting forests.*

*When harvesting wood, according to the forest legislation of the Republic of Belarus, species listed in the Red Book and their habitats are subject to conservation. Harvesting of valuable, endangered and specially*

*protected tree species is prohibited. Harvesting of tree species that are on the IUCN and CITES lists is excluded, since the distribution areal of these species is outside the Supply base of LLC BelaBio-Grupp.*

*In Belarus there are two republican reserves - the Berezinsky Biosphere Reserve (85.2 thousand ha) and the Polessky State Radiation and Ecological Reserve (216.1 thousand ha), and four national parks - BelovezhskayaPushcha (152.962 thousand ha), Braslav Lakes (69.115 thousand hectares), Narochansky (93.3 thousand hectares) and Pripyatsky (85.841 thousand hectares), 334 reserves of republican and local significance and 874 natural monuments.*

*Forest certification is an effective tool to combat illegal logging and illegal timber trafficking. Taking into account the requirements of the international scheme of the Forest Stewardship Council (FSC), 9.027 million hectares of forest fund are certified (94.2% of the total forest fund). PEFC have certified forest management and forest management systems of 105 legal entities conducting forestry on an area of 8.8 million hectares of forest fund.*

*The structure of the timber industry complex is represented by the following sectors: logging (13.5% of the total output), woodworking (69.5%), pulp and paper (16.4%) and the chemical industry (0.6%). The woodworking industry is one of the largest in Belarus. Woodworking accounts for approximately 2% of the total number of processing industries in the Republic of Belarus. The share of the forest industry in the country's GDP is approximately 1.1%. Timber is exported to approximately 30 countries.*

## 2.2 Actions taken to promote certification amongst feedstock supplier

*LLC BelaBio-Grupp buys only FSC certified feedstock.*

## 2.3 Final harvest sampling programme

*Not applicable.*

## 2.4 Flow diagram of feedstock inputs showing feedstock type

## 2.5 Quantification of the Supply Base

### Supply Base

- |                                     |   |
|-------------------------------------|---|
| a. Total Supply Base area (ha):     | <b>9,582 mln ha</b>   |
| b. Tenure by type (ha):             | <b>9,582 mln ha state owned</b>                                   |
| c. Forest by type (ha):             | <b>9,582 mln ha temperate</b>                                     |
| d. Forest by management type (ha):  | <b>9,582 mln ha managed natural</b>                               |
| e. Certified forest by scheme (ha): | <b>9,027 mln ha FSC-certified and 8,595 mln ha PEFC-certified</b> |

## Feedstock

- f. Total volume of Feedstock: **3467,68 tons;**
- g. Volume of primary feedstock: **3467,68 tons;**
- h. List percentage of primary feedstock (g), by the following categories. Subdivide by SBP-approved Forest Management Schemes:
  - Certified to an SBP-approved Forest Management Scheme -- **0%**;
  - Not certified to an SBP-approved Forest Management Scheme – **0%**;
- i. List all species in primary feedstock, including scientific name
- j. Volume of primary feedstock from primary forest – **0%**;
- k. List percentage of primary feedstock from primary forest (j), by the following categories. Subdivide by SBP-approved Forest Management Schemes:
  - Primary feedstock from primary forest certified to an SBP-approved Forest Management Scheme – **100%**;
  - Primary feedstock from primary forest not certified to an SBP-approved Forest Management Scheme – **0%**;
- l. Volume of secondary feedstock: **0 tons;**
- m. Volume of tertiary feedstock: **0 tons.**

### 3 Requirement for a Supply Base Evaluation

SBE completed	SBE not completed
<input type="checkbox"/>	V

*SBE is not required, since the feedstock used for biomass production is FSC certified primary feedstock.*

## 4 Supply Base Evaluation

### 4.1 Scope

*Not applicable.*

### 4.2 Justification

*Not applicable.*

### 4.3 Results of Risk Assessment

*Not applicable.*

### 4.4 Results of Supplier Verification Programme

*Not applicable.*

### 4.5 Conclusion

*Not applicable.*

## 5 Supply Base Evaluation Process

*Not applicable.*

## 6 Stakeholder Consultation

*Not applicable.*

### 6.1 Response to stakeholder comments

*Not applicable.*

## 7 Overview of Initial Assessment of Risk

*Not applicable.*

## 8 Supplier Verification Programme

### 8.1 Description of the Supplier Verification Programme

*Not applicable.*

### 8.2 Site visits

*Not applicable.*

### 8.3 Conclusions from the Supplier Verification Programme

*Not applicable.*

## 9 Mitigation Measures

### 9.1 Mitigation measures

*Not applicable.*

### 9.2 Monitoring and outcomes

*Not applicable.*

## 10 Detailed Findings for Indicators

*Not applicable.*

## 11 Review of Report

### 11.1 Peer review

*The Supply base report was prepared with the support of qualified SBP certification consultant Tatiana Savelyeva.*

### 11.2 Public or additional reviews

*The Supply base report is available at [www.belabio.com](http://www.belabio.com). Any comments can be sent to the SBP manager Marina Golovkova for review at [belabio2018@gmail.com](mailto:belabio2018@gmail.com).*

## 12 Approval of Report

Approval of Supply Base Report by senior management			
Report Prepared by:	<p><b>Marina Golovkova</b></p> 	<p><b>Accountant, SBP manager</b></p>	<p><b>24/02/2020</b></p>
	Name	Title	Date
<p>The undersigned persons confirm that I/we are members of the organisation’s senior management and do hereby affirm that the contents of this evaluation report were duly acknowledged by senior management as being accurate prior to approval and finalisation of the report.</p>			
Report approved by:	<p><b>Yuriy Sidorenko</b></p> 	<p><b>Director</b></p>	<p><b>24/02/2020</b></p>
	Name	Title	Date

## 13 Updates

### 13.1 Significant changes in the Supply Base

*At the moment of main assessment is not applicable.*

### 13.2 Effectiveness of previous mitigation measures

*Not applicable.*

### 13.3 New risk ratings and mitigation measures

*Not applicable.*

### 13.4 Actual figures for feedstock over the previous 12 months

3467,68 tons.

### 13.5 Projected figures for feedstock over the next 12 months

5 000 tons.
